SOP & Operational Workflow Design

Create a repeatable task intake, execution and approval process.

Independent Demonstration Project. Illustrative materials created to showcase professional capabilities. Not a commercial client engagement.

SCENARIO AND ASSUMPTIONS

Example workflow for a remote data operations team; no client systems or data used.

KEY FIGURES (ILLUSTRATIVE)

5	3	5
workflow stages	roles with clear ownership	controls, each with evidence

DELIVERY APPROACH

1. **Intake** — Lead confirms scope, due date and acceptance rules.
2. **Assignment** — Coordinator allocates tasks to trained contributors.
3. **Execution** — Contributor follows checklist and flags ambiguities.
4. **Review** — Reviewer approves or returns with defect codes.
5. **Closure** — Lead verifies acceptance, archives records and reports delivery.

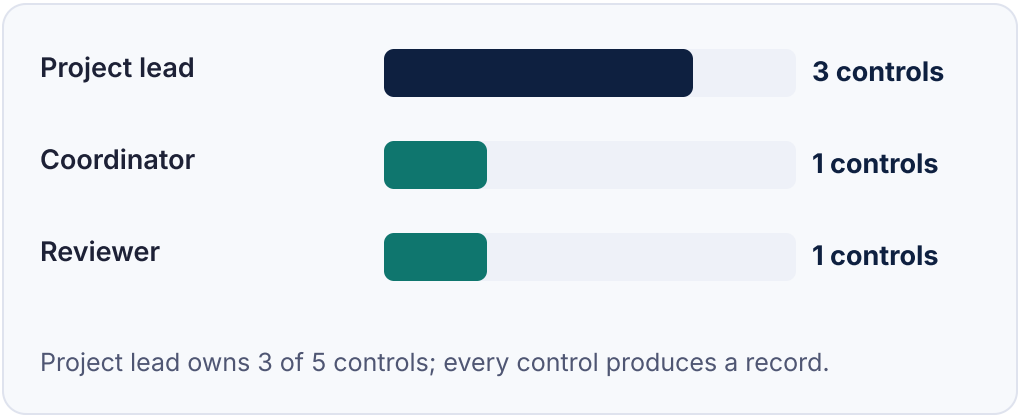
SOP & Operational Workflow Design

Illustrative planning and monitoring example. All values are synthetic and are not actual client outcomes.

CONTROL TABLE

CONTROL	OWNER	EVIDENCE
Scope approval	Project lead	Intake checklist
Task allocation	Coordinator	Assignment log
Quality gate	Reviewer	Review record
Exception escalation	Project lead	Issue register
Final delivery	Project lead	Acceptance log

WHO OWNS EACH STAGE (ILLUSTRATIVE)



Project lead owns 3 of 5 controls; every control produces a record.
